

Alissa Bengtson | Front-End Web Developer

Connecticut, USA • avbengt@gmail.com • [Website](#) • [LinkedIn](#)

Summary

Front-End Web Developer with 13+ years of experience building responsive, high-performance websites. Skilled in HTML, CSS, and JavaScript, with hands-on experience using React, Next.js, and Tailwind CSS. Comfortable working with component-based architecture, reusable components, and optimizing for performance. Experienced in API integration and collaborating with designers and backend teams to deliver cohesive, engaging user experiences across devices and browsers.

Professional Experience

Web Producer – Alludo (formerly Corel Corporation) (Remote)

Jul 2011 – Nov 2024

Developed and maintained global marketing websites for high-traffic brands, focusing on performance, responsive design, and seamless cross-device experiences.

- Hand-coded pixel-perfect pages from Figma designs using HTML, CSS, and JavaScript/jQuery, viewed by over a million users per week for brands like Parallels and WinZip.
 - Built reusable front-end components and styles to maintain design consistency across campaigns.
 - Contributed extensively to the migration of the Parallels website from a legacy CMS to Django, rebuilding thousands of localized pages while ensuring design and accessibility standards (WCAG A).
 - Streamlined builds and deployments with Jenkins-based CI/CD pipelines for smoother production releases.
 - Collaborated with designers, stakeholders, and QA to refine web experiences, landing pages, and marketing assets that boosted engagement and conversions.
 - Performed cross-browser testing and code reviews to ensure quality, performance, and compatibility.
-

Personal Projects

Weather App (In Progress) – React/Next.js, OpenWeather API, Tailwind CSS – [Live Demo](#)

- Building a responsive weather application with current conditions, 5-day forecasts, hourly forecasts, and moon phase data using the OpenWeather One Call API.
- Implementing location-based search with autocomplete and dynamic UI theming based on hourly data.
- Creating reusable components and efficient API data parsing for a smooth, engaging user experience.

AIM Revival (In Progress) – React, Component-based Architecture

- Recreating a nostalgic AOL Instant Messenger interface with draggable login and chat windows.
 - Developing taskbar functionality and window state management to mimic the original AIM behavior.
 - Styling the interface to authentically match the look and feel of the classic AIM.
