

Alissa Bengtson | Front-End Web Developer

Connecticut, USA • avbengt@gmail.com • [Website](#) • [LinkedIn](#)

Summary

Passionate Front-End Web Developer with over 13 years of expertise in building responsive, pixel-perfect websites using HTML, CSS, and JavaScript. Currently expanding my skills in React and Next.js to develop more dynamic, component-driven web applications. Dedicated to collaborating with UI/UX teams, optimizing web performance, and ensuring seamless functionality across devices to enhance user satisfaction and drive conversions.

Professional Experience

Web Producer – Alludo (formerly Corel Corporation) (Remote)

Jul 2011 – Nov 2024

Implemented designs and contributed to the development of global marketing websites for high-traffic brands, focusing on performance, user experience, and cross-team collaboration.

- Hand-coded pixel-perfect, responsive pages from wireframes using HTML, CSS, and JavaScript/jQuery, viewed by over a million users per week for brands like Parallels and WinZip.
 - Improved user experience and performance across mobile and desktop platforms.
 - Collaborated with designers and stakeholders to refine web experiences and support high-impact projects.
 - Helped execute the migration of the Parallels website from a legacy CMS to a Django-based platform, rebuilding thousands of pages - including localized versions - and ensuring design consistency.
 - Built landing pages and marketing assets aligned with campaign goals to boost engagement and conversions.
 - Enhanced functionality and usability of Django-based pages, improving navigation and overall user experience.
 - Performed code reviews and cross-browser testing to maintain quality and compatibility.
-
